

Eleanor Beveridge, R.N.

Educating to Promote
Understanding and
Enhance Wellbeing

My Commitment

Eleanor is passionate about improving and maintaining the wellbeing of her clients.

This service provides specialist education and support to achieve optimal health solutions.

The focus is to promote independence in diabetes management.

A phone service is provided to support ongoing insulin stabilisation.

- Individual & group consultations.

- Home and nursing home visits.

Educating to Promote Understanding and Enhance Wellbeing

At Integrated Diabetes Care the primary goal is for our clients to understand their diabetes and learn how to optimise their health.

We take a holistic approach.

An individual plan will consider diet, exercise and stress management. It includes blood glucose monitoring and if necessary, insulin initiation.

If required you will be referred to other allied health professionals.

With knowledge and understanding of diabetes you are empowered to promote your health and wellbeing.

Integrated Diabetes Care will provide education for health care professionals.
